Dimensional Metrology Mar4D PLQ 3200-T4 (Z=450/50 kg)

产品特性

Speed:

- # Extremely fast, mechanical-optical workpiece alignment by means of a fully automatic centering and tilting table in combination with the matrix camera
- # Axis movements with a unique speed of up to 200 mm/s
- # Very fast and high-resolution matrix camera with a large field of view of 15x10 mm (WxH)
- # Joint evaluation of all collected measurement data via MarWin

Productivity:

- # Workpieces that have not been manufactured between tips are simply clamped in the chuck
- # Many different measuring functions 技术数据 combined in one device
- # Flexible measurement of workpieces with up to D=210 mm, L=450 mm and 50 kg directly in production next to the production machines
- # Increase in measuring capacities and reduced waiting times

Precision

- # Compensation of eccentrics of several millimeters to 1 $\,\mu\,m$ in less than 30 seconds
- # Integrated environmental controls, such as active temperature compensation of the device, ensure consistent measurement quality and significantly reduce waste.
- # The motorized tailstock with clamping force monitoring prevents operator influences and increases the reproducibility of the measurement results

User-friendliness:

- # The ergonomic housing and interior design enables convenient and gentle operation for many hours
- # Light curtains and interior monitoring protect people and measuring devices
- # All devices are "robot-ready" and automation solutions, such as robot loading, can be implemented quickly and directly through our specialized MES department
